Designs for Vision is introducing an advanced photonic design that provides uniform light distribution with maximum intensity. The patent-pending headlights optically focus the light from the LED to provide 45 percent more light with uniform distribution.

The new LED DayLite® Micro HDi™ uses the new high-definition imaging in an ultra-lightweight headlight in combination with the new Micro power pack. According to the company, the Micro is the market’s lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

Prior technology married a cordless light to one pair of loupes via a cumbersome integration of the batteries and electronics into the frame. The compact design of the LED DayLite WireLess headlights are independent of any frame/loupes.

Designs for Vision’s WireLess headlights free you from being tethered to a battery pack. The simple modular designs unouple the headlights from a specific frame or single pair of loupes.

High-definition headlights optically focus the light from the LED to provide 45 percent more light with uniform distribution.

A new location
Designs for Vision is expanding into a new 67,500 square foot location at 4000 Veterans Memorial Highway in Bohemia, N.Y. You can visit www.DesignsForVision.com/move.htm to check out some photos of the new facility.

You can see the “Visible Difference®” by visiting Designs for Vision in booth Nos. 1018 or 2637 at ADA 2017 or booth Nos. 1920 or 420 at the AAOMS meeting. Or you can arrange a visit in your office by contacting the company at (800) 345-4009 or via info@dvimail.com.
