Exclusive exhibit hall hours, March 21–22

The 2019 Thomas P. Hinman Dental Meeting, scheduled for March 21-23 (Thursday through Saturday) in Atlanta, is introducing four new educational opportunities on the exhibit floor at this year’s meeting. The quick-paced sessions will feature 10-minute presentations from exhibitors sharing the latest products, technology and services for dental practices and professionals. The new sessions include:

- **Auxiliary Breakfast & Learn** on Thursday from 8:30–9:30 a.m.
- **Dentist Lunch & Learn** on Thursday from noon–1 p.m.
- **Dentist Breakfast & Learn** on Friday from 8:30–9:30 a.m.
- **Auxiliary Lunch & Learn** on Friday from noon–1 p.m.

**Hinman Hoops area**

"Our 2019 exhibit hall offers more than ever before with numerous opportunities to earn free C.E. and learn about the latest developments in dentistry," said Dr. Jonathan Dubin, general chair for Hinman 2019. “Also, you can enjoy everything the exhibit hall offers without missing the NCAA Basketball Tournament, which will be shown on screens located in our popular Hinman Hoops area.”

In addition to the extra C.E. opportunities, Hinman 2019 is offering exclusive exhibit hall hours on Thursday and Friday. Dental professionals are invited to visit Hinman’s exhibit hall on Thursday from 3–5 p.m. and Friday from 5–6 p.m. to take advantage of dedicated professional networking and shopping time.

The exhibit hall will feature more than 400 exhibiting companies showcasing new technology, equipment, products and services for the entire dental staff. The exhibit hall will be open on Thursday from 9:30 a.m.–5 p.m., Friday from 9:30 a.m.–6 p.m., and Saturday from 9:30 a.m.–3 p.m.

**C.E. table clinics**

Attendees can obtain free C.E. credit in the exhibit hall throughout the meeting. Table clinics, at the back of aisle 1900 on all three days, offer more than 100 table-top presentations, each about 10 minutes in length, provided by dental community volunteers— including military personnel. Participants receive one hour of C.E. credit for each hour they spend in the Table Clinic area.

Table Clinic hours are: Thursday from 10 a.m.–1 p.m. and 2–5 p.m., Friday from 10:30 a.m.–1:30 p.m. and 3–6 p.m. and Saturday from 10 a.m.–1 p.m.

**Health pavilion, learning lab, more**

Hinman’s Total Health Pavilion returns this year, in booth No. 1553. Attendees will be able to learn about healthy living, sample nourishing snacks, talk to lifestyle experts — and earn C.E. credit.

The exhibit hall will also feature the Learning Lab Co-Op, offering lab tech expertise for dentists and technicians alike. Lectures (in the Georgia World Congress Center course rooms) and demonstrations (booth No. 201) will be offered all three days. Also in the 2019 exhibit hall:

- **Hinman Marketplace,** has non-dental-related exhibitors in booth Nos. 347 to 560.
- **The Hinman Shop,** located in the marketplace (booth No. 456), will offer Hinman souvenirs. Proceeds will help fund student scholarships.
- **The Attendee Power Lounge,** in booth No. 757, enables attendees to meet with friends and colleagues or rest, relax and charge mobile devices, courtesy of Dentsply Sirona.
- **Hinman Eatery & Dining Dollars** enable attendees to save on lunch in the Hinman eateries with Dining-Dollar coupons provided in the Hinman Program and Exhibits Guide. The Eatery hours are from 11 a.m.–3 p.m. on Thursday and Friday and from 10 a.m.–2 p.m. on Saturday.
- **Wi-Fi** is free in the exhibit hall and in all course rooms at the Georgia World Congress Center.

**See HINMAN,** page A3
Science, industry and pediatric dentistry

The annual session of the American Academy of Pediatric Dentistry this year is in the academy’s hometown, Chicago, from May 23–26. The meeting’s host site is the landmark Chicago Hilton on South Michigan Avenue, just across the street from Grant Park’s 8th Street Fountain and Formal Gardens and a short stroll from the iconic Buckingham Fountain. Twelve blocks north is the city’s internationally known shopping destination, the Magnificent Mile.

The Sunstar Welcome Reception will be held at the Museum of Science and Industry, in Chicago’s historic Hyde Park neighborhood. Attendees will be able to meet with new friends and colleagues against the backdrop of an endlessly fascinating and interactive experience. Among the museum’s most famed highlights are opportunities to explore a full-scale replica of the historic U-505 submarine captured during World War II, walk through a 40-foot water-vapor tornado, pilot a fighter-jet flight simulator, lord over 3,500-square-foot model railroad and peer into the Apollo 8 command module.

The opening ceremony keynote speaker is retired Colonel Nicole Malachowski, the first female pilot of the Air Force Thunderbirds Aerobatic Demonstration Team. Her address, “Headwinds of Change,” could also serve as an overarching theme of the meeting’s scientific program, with an agenda packed full of timely topics reflecting dentistry’s dizzying pace of advancements. Topics include pediatric esthetics, brain development, precision medicine, obstructive sleep apnea, sedation, a dental benefits symposium and an evidence-based training workshop.

The scientific sessions open on Thursday with the preconference course “Speak Up for Patient Health: Critical Conversations on Controversial Issues.” The interactive session offers practical advice on how to effectively discuss difficult topics such as weight issues, eating disorders, substance use, transgender issues, pregnancy, sexual practices and sexually transmitted infections. Saturday’s invitation-only donor appreciation gala for Healthy Smiles.

Healthy Children, the AAPD’s foundation mission, will be at the forefront. The event supports the foundation’s mission of providing dental homes for underserved children. The President’s Farewell Dinner on Sunday will be held in a uniquely renovated pre-Chicago Fire building. Morgan Manufacturing is a 32,000-square-foot event venue that describes itself as a “world-class space with Chicago swagger, designed around a concept of modularity and industrial elegance.” Registration, lodging and other details can be found online at annual.aapd.org.

Dental Days of Quebec set for May 25–28

The 49th International Dental Days of Quebec (IDQ), the annual conference of the Ordre des Dentistes du Quebec, will be held from May 25–28 (Saturday through Tuesday) at the Montreal Convention Center (the Palais des Congres de Montreal) in Montreal, Quebec, right near the heart of the old-world charm of historic Old Montreal.

The annual C.E. and exhibition event is the annual meeting place for Quebec dentists and dental-team members, while also attracting attendees from across the world. With more than 12,000 participants, it is considered the largest dental conference in Canada.

The mission of the Ordre des Dentistes du Quebec, representing approximately 5,300 dentists, is to ensure the quality of dental services through high standards of practice and ethics and to promote oral health among the people of Quebec.

The C.E. courses feature theoretical and practical training presented by renowned speakers from Canada and around the world. The courses and workshops focus on topics related to dental practice, as well as the technical and scientific advancements that influence the current and future practice of dentistry.

The meeting’s two-day exhibit hall will be on Monday and Tuesday, May 27-28. IDQ 2019 marks the third iteration of the CELArlation event. In collaboration with the Order of Dental Technicians of Quebec (OTTDQ), the meeting provides a full day of sessions and clinical tables, as well as an exhibition featuring specialized products and services.

The first diesel-powered streamlined stainless-steel passenger train, the Pioneer Zephyr, is among the many interactive visits to explore at the AAPD 2019 Welcome Reception at Chicago’s famed Museum of Science and Industry. Photo/B. Specter/Museum of Science and Industry, Chicago.

Do you have general comments or criticism you would like to share? Is there a particular topic you would like to see articles about in Dental Tribune? Let us know by sending an email to feedback@dental-tribune.com. We look forward to hearing from you!
Find the ‘Power of the Complete Team’ in Florida

Discover the ‘Power of the Complete Team’ at the 2019 Florida Dental Convention (FDC), June 27-29, at the Gaylord Palms Resort and Convention Center in Orlando. This year’s program focuses on collaboration among the entire dental team. FDC2019 offers 130-plus courses to enhance and refine skills for everyone on the dental team. Attendees can earn up to 20 hours of C.E. credit. Course highlights include topics such as Botox/dermal fillers, dental implants, all-on-four dentures, insurance coding, reading body language and much more.

Exclusively at FDC2019, “Dawson Seminar 1: From TMJ to Smile Design” is being offered for a substantially discounted price. In this introductory seminar to The Dawson Academy’s “The Concept of Dentistry® Series,” participants will learn the timeless message that good, esthetic and complete dentistry must begin with a thorough understanding of dental occlusion and the functions of the masticatory system. In addition to this Dawson Seminar 1, attendees will be able to take advantage of individual breakout sessions being presented by a number of Dawson Academy faculty members.

New this year, attendees can visit the exhibit hall for free with an “Exhibit Hall Only” pass. It’s available to any dental professional or guest who opts to register as “Exhibit Hall Only” to take advantage of the offer. More than 300-plus exhibiting companies and organizations will be on the exhibit floor with the profession’s latest technology, materials, instrumentation and other products and services.

The adage, “Come for the C.E. and stay for the fun,” takes on new meaning at the Gaylord Palms Resort. Without ever having to leave the site, attendees will be able to relax at the adult-only pool or tap into your inner child on one of the many waterslides.

Other fun events during FDC2019 include Thursday’s “Beer Tasting in Paradise,” featuring a five-course tasting and beer pairing where all proceeds will benefit the FDA Foundation. Then, join your colleagues at an all-request show at “Dueling Pianos.” On Friday, you can walk the plank to “Pirate Island” for live music and family-friendly fun. If you are looking for nightlife, end the day celebrating the new dentists and ASDA students at “The After Party.”

Beyond the on-site events, you can “Stay for the Magic” and enjoy the area’s Walt Disney World theme parks at a discounted price for convention attendees. Meeting organizers encourage you to bring your team and join your colleagues, June 27-29, to discover the “Power of the Complete Team.” You can register at www.floridadentalconvention.com. For questions, you can email fdc@floridadental.org or call (850) 681-3629.

Ultra-bright light is ultralight in weight

**High-definition, uniform light at maximum intensity**

By Designs for Vision Staff

Designs for Vision is introducing an advanced photonic design that provides uniform light distribution with maximum intensity. The patent-pending headlights optically focus the light from the LED to provide 45 percent more light with uniform distribution.

The new LED DayLite® Micro HD™ uses the new high-definition imaging in an ultra-lightweight headlight in combination with the new Micro power pack. According to the company, the Micro is the market’s lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

Designs for Vision also has added high-definition imaging to the LED DayLite WireLess Mini HDI, providing a lightweight cordless solution with light intensity comparable to many corded headlights.

You can choose high-definition imaging with either a wired or wireless design to meet your preference, and either HDI headlight will illuminate the entire oral cavity. Designs for Vision’s WireLess headlights free you from being tethered to a battery pack. The simple modular designs uncouple the headlights from a specific frame or single pair of loupes. Prior technology married a cordless light to one pair of loupes via a cumbersome integration of the batteries and electronics into the frame.

The compact design of the LED DayLite WireLess headlights are independent of any frame/loupes. Designs for Vision is also featuring the “REALITY five-star-rated” Micro 3.5EF Scopes, which use an innovative optical design that reduces the size of the prismatic telescope by 50 percent and reduces the weight by 40 percent — while providing an expanded-field, full-oral-cavity view at 3.5x magnification.

Building on an established award-winning design, the newest addition to the Micro Series line is the Micro 4.5EF Scopes, which reduce both the size and weight of the telescopes by 44 percent. Designs for Vision has expanded into a new 67,500-square-foot location at 4000 Veterans Memorial Highway in Bohemia, N.Y. To see photos of the new facility you can visit www.DesignsForVision.com/move.htm.

You can see the Visible Difference® yourself by visiting the Designs for Vision booth at the Thomas P. Hinman Dental Meeting (booth No. 1005) in Atlanta or at the Academy of Osseointegration Annual Meeting (booth No. 738) in Washington, D.C.

You also can arrange a visit in your office by calling Designs for Vision at (800) 345-4009 or emailing the company at info@dvimail.com.

DMG, one of the world’s leading manufacturers of restorative materials and preventive products, has introduced a precision placement delivery system for a wide range of dental materials. The DMG Composite Dispenser is particularly effective with DMG’s Ecosite Bulk Fill composite.

The dispenser is designed to simplify workflow by placing materials precisely and accurately. It’s built for fast, easy placement of composites, cements, glass ionomers and more. It has ergonomic handle grips and maneuvers easily, enabling an effortless load. According to DMG, the Composite Dispenser provides quick, easy and precise placement of materials; convenient autoclaving for infection control; comfort and ease when holding and maneuvering; and effortless loading.

Together, the Composite Dispenser and Ecosite Bulk Fill can have a significant synergistic effect on a practice’s productivity, the company asserts. Ecosite’s technology avoids the two traditional drawbacks associated with bulk-fill composites: short working time and sub-optimal esthetics. Instead, according to the company, Ecosite offers a maximum depth of 5 mm, a single 20-second composite cure, low shrinkage stress — and exceptional adaptability, packability and handling. The company reports that the material also has high polishability, extra fluoride release and natural esthetics. It does not require a capping layer nor does it stick to instruments.

For more information about the DMG Composite Dispenser or Ecosite Bulk Fill, you can visit dmg-america.com.
AO meeting to feature surgical, prosthetic tracks

By AO Staff

To drive home its theme of "Current Factors in Clinical Excellence," the Academy of Osseointegration’s 2019 Annual Meeting will offer a full day of concurrent surgical and prosthetic tracks on March 15 to answer the clinical and scientific questions that all clinicians ask themselves, no matter his or her specialty.

Morning sessions

Whichever sessions attendees choose, each track will begin with its own respective plenary session entitled, "10 Years After." The idea to have a session '10 Years After' means asking why you have changed, if you have changed, your practice, your protocols and your indications,” said Dr. Franck Renouard, 2019 annual program committee chairperson. “We will ask different speakers, both in surgery and prosthetics, what they did then and what they do now. Moderators for "10 Years After" will include Edward Sevetz Jr., DMD, for the surgical track and Stephen Parel, DDS, for the prosthetic track. Topics of the "10 Years After" surgical track will include vertical and lateral ridge augmentation; full maxillary reconstruction; and augmentation using biologics.

"What differences have become routine in the past years, compared to the ‘early’ days? Techniques have better esthetic results and techniques can provide faster results. The bottom line is more patients can be treated, more successfully, more quickly and with better-looking, enhanced smiles," said Sevetz, an AO and Osseointegration Foundation (OF) past president. "All meetings tell attendees about ‘progress.’ However, the AO Annual Meeting is where they will find the most scientifically oriented, evidence-based source for better patient care using osseointegration.”

For the Friday "10 Years After" prosthetic track, Parel, an AO past president, will moderate a series of seven topics, including "10 Years After" for zirconium and screw-retained prosthesis, overdenture and tilted implants.

Afternoon sessions

Following the plenary sessions, each of the tracks will continue their respective programming and return to the science that underpins implant dentistry, featuring sessions on peri-implant bone biology. For the surgical track, the two main sessions will include "Osseointegration: Restoration of Homeostasis or..."

March meeting offers different focuses for varied audience

By AO Staff

After surpassing its $1 million 2018 annual fund campaign goal, the OMS Foundation is poised to further support research and education that can improve patient care in oral and maxillofacial surgery.

The foundation established the $1 million campaign goal to honor the centennial of the American Association of Oral and Maxillofacial Surgeons (AAOMS), its parent organization that was founded in 1918 and today represents more than 9,000 oral and maxillofacial surgeons across the United States.

"We set an ambitious fundraising goal as a way to celebrate AAOMS’s 100th anniversary, and the OMS specialty responded beyond even our expectations," said Kathy A. Banks, DMD, chair of the Foundation Board of Directors.

OMS National Insurance Co. (OMSNIC) jumpstarted the campaign with a $100,000 gift-match challenge that generated $300,000 in three months. Subsequent challenges supported by AAOMS and Treloar & Heisel, an insurance provider for dentists and specialists, also surpassed their goals. Individual gifts ranging from $5 to $10,000 sustained the momentum of the campaign. Support also arrived from the International Association of Oral and Maxillofacial Surgeons (IAOMS), the American Board of Oral and Maxillofacial Surgery (ABOMS), the American College of Oral and Maxillofacial Surgeons (ACOMS), the Canadian Association of Oral and Maxillofacial Surgeons (CAOMS), 36 state and regional OMS societies and several college and university OMS training programs.

AAOMS President A. Thomas Indresano, DMD, FACS, and his wife, Rita, made the pivotal contribution to put the cam...
a Foreign Body Response?” moderated by J.E. Davies, BDS, PhD, DSc, and “Soft-Tissue Integration: What is Our Current Understanding?” under the direction of moderator AO Past President Clarence Lindquist, DDS.

For the prosthetic track, the first afternoon session will be entitled “The Evolution of Complex Maxillofacial Rehabilitation.” Moderated by Dennis Rohner, MD, DDS, three teams of surgeons and prosthodontists will discuss the latest developments in complex maxillofacial rehabilitation, representing what is possibly the most challenging domain in the spectrum of implant dentistry.

The prosthetic track will conclude with “Current Thought in Restorative Ceramics” moderated by AO Past President Russell Nishimura, DDS. Presenters will discuss indications and limitations of ceramic restorations on implants, present the advantages and defining the boundaries of their use in everyday clinical practice.

“We would like it so when attendees leave the meeting, they can apply some techniques and protocols or ways they can manage their offices when they return on Monday morning,” Renouard concluded.

Glidewell Dental to present 3rd annual educational symposium in Orlando

By Glidewell Dental Staff

Glidewell Dental, a leader in dental education and a technological innovator in restorative dentistry for nearly 50 years, has announced the third annual Glidewell Dental Symposium.

Scheduled for Nov. 8–9, at the Hilton Bonnet Creek and Waldorf Astoria in Orlando, Fla., the event will provide practical clinical and business education, with a first day of fast-paced presentations and a second day of in-depth lectures and hands-on programs crafted specifically to help doctors overcome the challenges of everyday dentistry. Attendees enrolled for both days will earn up to 12 hours of continuing education (C.E.) credits.

“This is an exciting time to be involved in dentistry,” said Dr. Neil Park, scientific chair of the Glidewell Symposium and vice president of clinical affairs at Glidewell Dental. “From innovative technologies to progressive clinical techniques, there are many opportunities to help improve oral health and transform the smiles of patients. The Glidewell Symposium, now in its third year, aims to bring dentists the emerging science, technology and clinical methodologies that will define the future of dentistry. The curriculum is intended to help clinicians learn new tools and techniques to expand their service offerings, overcome challenges and meet the needs of patients.”

Dentists have conveyed a growing need for practical and hands-on dental education, as demonstrated by last year’s Glidewell Symposium, which more than doubled in size from the previous year and sold out three months before the event. In recognition of this strong enthusiasm, and to accommodate dentists in 2019, the Glidewell Symposium has moved to a world-class location in Orlando and will bring together even more experts from diverse areas of dentistry.

During this weekend of networking and education, topics will include everything from dental implants, restorative techniques and esthetic dentistry, to in-office milling, sleep-related dentistry and practice management. All courses are designed to provide real-world clinical and business solutions so that attendees can achieve immediate, tangible results when they return to their practices on Monday.

“On the general session on Friday, we will have a full day, with 16 fast-paced presentations that eliminate the nonessential information and get right to the heart of the clinical technique or business strategy being presented,” Park said. “And on Saturday, attendees can choose from nearly 20 focused lectures and hands-on programs that further expand on the topics that matter most to the individual attendee. We are taking the educational format that was so popular last year and making it even better.”

On both days of the event, attendees will also be able to browse interactive exhibits that feature the latest in 3-D printing, intraoral scanning, in-office milling, the CAD/CAM workflow, dental implants, and regenerative and restorative materials. There will be live demonstrations, virtual reality tours and opportunities for one-on-one discussions.

The 2019 Glidewell Dental Symposium is for dentists, hygienists, and chairside and front-office staff. Tuition for the Friday general session is $195, and to register for sessions on both Friday and Saturday, tuition is $320. Early bird pricing is available for $145 and $270, respectively, when registering by May 1. Friday tuition includes a complimentary breakfast, lunch and cocktail reception with hosted bar; Saturday tuition includes breakfast.

Because last year’s symposium sold out quickly, attendees are encouraged to register early to secure seats.

For the complete symposium agenda and to register, visit glidewellsymposium.com or call (866) 791-9539.
