AACD education to focus on four main collections

‘Biggest names’ on annual meeting’s agenda

The American Academy of Cosmetic Dentistry is referring to its upcoming annual meeting as “a masterpiece of comprehensive cosmetic dentistry education.”

The AACD 2018 program, from April 18-21 at McCormick Place Lakeside Center in Chicago, will feature a selection of topics and speakers that have been specifically selected to keep attendees on top of the industry’s latest advancements.

The educational program will comprise four main collections of focused education.

The Complex Case collection features some of the biggest names in dentistry discussing some of the profession’s most complicated cases. Lee Culp, CDT; Joseph Kan, DDS, MS; Aldo Leopardi, BDS, DDS, and Michael Sesemann, DDS, FAADC, will tackle two cases—one involving six or more restorations in the upper arch, including implants and natural teeth, and another involving six or more indirect restorations in the upper arch where all restorations are on natural teeth. Attendees will be able to engage with these specialists as they discuss the challenges of these complex cases and solutions for treatment. The Accreditation collection features top academy educators helping attendees on their way to achieving clinical excellence and professional distinction. Under the guidance of Accreditation Chairman John Rowe Jr, DDS, AAADC, and featuring Fred Arnold III, DDS, FAADC; Betsy Bakeman, DDS, FAADC; Scott Finlay, DDS, FAADC; Brian LeSage, DDS, FAADC; Brett Magnuson, DMD, AAADC; Frank Milnar, DDS, AAADC; Adamo Notarantonio, DDS, AAADC; Bradley J. Olsen, DDS, FAADC; Michael R. Sesemann, DDS, FAADC; John Weston, DDS, FAADC, and Corky Willibale, DDS, FAADC, attendees can work hands-on toward mastery of some of the most in-demand and profitable cosmetic case types and get started on their journey to becoming an accredited member of AACD.

The Lab Focus collection features two full days of the top dental technicians in the field presenting the latest techniques and materials. Jungo Endo, RDT; Edris Rasta, RDT; Thomas Sing, RDT; Sung Bin Chicago’s McCormick Place Lakeside Center is the host site of the 2018 American Academy of Cosmetic Dentistry annual meeting. Minimally invasive root canal treatment uses fluids, acoustics

By Sonendo Staff

The GentleWave® System offers a minimally invasive alternative to standard root canal treatment, employing patented Multisonic Ultracleaning® technology to deliver fluids throughout the entire root canal system. The advanced combination of fluid dynamics and broad-spectrum acoustic technology enables the GentleWave Procedure to reach into the deepest, most complex portions of the root canal system to remove tissue, debris and bacteria.

The result is a more thorough, more effective cleaning that potentially helps reduce the need for retreatments over time. The GentleWave procedure also helps preserve the integrity and functionality of the tooth by leaving more of the dentin structure intact and can typically be completed in just one session.

For more information, you can contact Sonendo® at (844) 766-3636 or visit www.Sonendo.com.
