**Plenty to look forward to at DTSC Symposia**

- **Nov. 29, 10-11 a.m.; One-step Adhesive.** One-step Cementation, George Freedman, DDS
- **Nov. 29, 11:30 a.m.-12:30 p.m.; High-resolution Cone Beam with PreXion 3-D, Dan McEwen, DDS**
  Cone-beam computed tomography (CBCT) is heralding a new paradigm to dental radiography. From what have been conventional 2-D images, dentists now have the ability to look at the maxilla and mandible from any orientation and any thickness as well as in 3-D.
  With the introduction of CBCT, the specialist and general dentist alike can now afford to own and enjoy the benefits of this fantastic diagnostic tool.
- **Nov. 29, 1:30-2:30 p.m.; Simply Esthetic Dentistry,** Steven Weinberg, DDS
  Dr. Weinberg’s presentation is a comprehensive, clinically-oriented program addressing the constant state of evolution in esthetic materials and restorative techniques. Participants will learn about a variety of materials, techniques and philosophies to create beautiful, long-lasting anterior esthetic restorations in an exciting educational environment.
- **Nov. 29, 3–p.m.; The Beauty of Bonding,** Howard Glazer, DDS
  This presentation will encompass the science of bonding, the art of composite restoration and the finesse of finishing and polishing. Using the most state-of-the-art materials, Dr. Glazer will explain the advantages and mastery needed to achieve the maximum esthetic and functional results for patients.
- **Nov. 30, 10–11 a.m.** EAD Sky: Dentistry’s Destination, Gary Severance, DDS and Lee Culp, DDS
  Demonstrating everything that dental professionals need for the design and fabrication of single-unit glass ceramic restorations, either chairside or benchtop, the program will be an informational and visual feast. The amazing display of all that modern dentistry offers for comprehensive care.
- **Nov. 30, 11:30 a.m.-12:30 p.m.; Know Your Products & Tools for Today’s Healing Dentistry,** Gary Goldsheimer, DDS
  This program focuses on the new technological advances that are making healing possible: scientific, accurate, reproducible and clinically significant caries detection; the potpourri of the latest and greatest products and tools that the dentist needs for healing therapies; gions, the new healing composite resin; photo-activated disinfection to promote remineralization and healing; and user-friendly laser technology to keep peri-implant in your office.
- **Nov. 30, 1:30-2:30 p.m.; Oralverse: In Practice,** Steven Glassman, DDS
  Oralverse is a local anesthesia reversal agent that accelerates the return to normal sensation after routine dental procedures. Clinical documentation showing the safety and efficacy of the drug in clinical trials will be highlighted.
- **Nov. 30, 3-4 p.m.; The Advantage of Small FoV High-resolution CBCT Imaging,** Dan McEwen, DDS
  This presentation will instruct you on how to take a 560 degree rotation with either 512 or 1,024 projections during the scanning time. You will learn how to produce ready-to-go 3-D, sagittal and coronal images within 50 seconds after the scan axial.
  Dr. McEwen will introduce PreXion 3-D, the only CBCT scanning unit using fractional built-in graphing, as well as 3-D rendering boards, which result in the highest resolution when considering all smaller FoV CBCT scanning devices.
- **Dec. 1, 10 – 11 a.m.; Technological Resources and Biological Concepts in Minimally Invasive Endodontics,** Renato Leonardo, DDS
  This course is ideal for the progressive general practitioner with a minimally-invasive practice.
  Along with hands-on training, clear demonstrations and an educational presentation, lecture participants can expect information about vital and non-vital pulp therapy, the Anatomical Endodontic Technology (A.E.T.) System and the Apical Delivered Obturation (A.D.O.) System.
- **Dec. 1, 11:30 a.m.-12:30 p.m.; Affordable Soft-tissue Diode Laser, Speaker TBD**
  The newest diode lasers cover the spectrum of all that modern dentistry offers for comprehensive care. They’re easy to use and incorporate into every practice. In fact, they’re so easy to afford that they should be installed in every operatory.
- **Dec. 1, 1:30-2:30 p.m.; Esthetics Using Cosmetic Periodontal Surgery,** David Hoexter, DMD
  A beautiful smile — the desired image — must be healthy and maintainable. In today’s society this goal is subjective and influenced by our interpretation of esthetics. Using periodontal techniques, specifically cosmetic periodontal surgical techniques, Dr. Hoexter will show how changing the background of the desired image will enhance it to appear brighter, cleaner, healthier, yet physiological, as well.
- **Dec. 1, 3–4 p.m.; You’ve Taken Implant Training... What Do You Do Next?**
  This course will discuss integrating implants into your practice. Staff education, auxiliaries’ responsibilities, identifying implant patients, case presentation skills, documentation and record keeping will be discussed. Focus will also be given to the tools that can aid the implant focused practice.
- **Dec. 2, 10–11 a.m.; Icon – Innovate Caries Treatment without Drilling,** George Freedman, DDS
  The course topics include: from research to chair-side; preserving healthy tooth structure; interproximal and smooth surface treatment options; step-by-step clinical procedure; cavity infiltration: present and future.
- **Dec. 2, 11:30 a.m.-12:30 p.m.; Immediate Tooth Replacement in the Esthetic Zone, Barry Levin, DDS**
  The time frame of three to six months of unloaded healing is not always transmissible anymore. With osteoconductive implant surfaces, newer implant materials and proper diagnoses, patients can often experience implant therapy without the inconvenience of removable temporary appliances and bonded provisional restorations.
- **Dec. 2, 1:30-2:30 p.m.; More Than Just Teeth and Gums,** Ron Schefflores, DDS
  Dental professionals are now incorporating blood screening, evidence-based supplementation, laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.
- **Dec. 2, 3–4 p.m.; My First Esthetic Implant Case: Why, How and When?**
  Marius Steigmann, DDS
  Esthetic dental implants are of increasing importance in today’s dentistry. Success from the esthetic aspect requires bone height and width, soft tissue architecture and prosthetic restorations be optimized.
  Out of these three elements, it is the soft-tissue frame that can be maintained or reconstructed not only using surgery, but also with the right prosthetic elements.

**The DTSC program is made available through educational grants provided by:**
SHOFU, PreXion, VOCO, D4D, Novodor Pharmaceuticals, Ultra-dent, Chase, AMD Lasers, DMG, Straumann. For registration — it’s free for GNNDM attendees — please visit www.gndymd.com or send an e-mail to info@gndymd.com.
