Medidenta now offers refining and waste disposal

With 65 plus years and counting, the company Medidenta has truly withstood the test of time and earned the trust of dental professionals around the world. The company has recently acquired a precious metal refining and waste disposal operation, which will now provide the entire dental community a service that will be unsurpassed in integrity and value, bar none.

Since 1944, Medidenta has morphed into a boutique of dental products where it dares to be different. Some of its products from the 1940s included copper bands, pre-fabricated jacket crowns and posts that sold for 15 cents each. And yes, the original product line even included Karat, a pure gold filling material, not to mention genuine silver points for root canal obturation, which in fact was the endodontic standard of care in the ’50s and ’60s.

Some of these items can be viewed on the “Nostalgia” section on the company’s Web site, www.medidenta.com. Medidenta’s product line has been synonymous with value because of “direct to the dentist” pricing. The company’s Sharps PLUS system is very easy: Fill it. Seal it. Ship it! Everything is included, including the tape, at a substantial savings.

In an era of financial uncertainty and mistrust of public conglomerates, dental professionals have a trusted name like Medidenta. This family-run company has that makes them the leaders they are.

When Achtziger was asked, “Why refining and precious metals and recycling?” his response was, “Some of Medidenta’s roots are with precious metals, and the overwhelming major- ity of our product line is, in fact, recyclable so this was a natural fit for us.” Thus, Medidenta is currently offering some new services.

Refining precious metal scrap. Medidenta can now smelt and assay scrap to determine the precious metal content, and pay the dental professional the highest dollar amount within a week. As a bonus, the practitioner will receive valuable discount coupons for other products listed in the Medidenta catalog.

In-office amalgam separator. The BOSS Amalgam Separator offers up to three years of safety, convenience, simplicity and environmental compliance for the ultimate protection for the entire dental office.

Dental offices can now forget about expensive long-term contracts for disposal of dental waste. The company’s Sharps PLUS system is very easy: Fill it. Seal it. Ship it! Everything is included, including the tape, at a substantial savings.

facturer of smart, innovative dental products. These products, used by den-
tists every day, are now sold in more
than 60 countries but the U.S. remains
by far the biggest market.
Triodent is one of New Zealand’s
fastest-growing companies and in
recent weeks has won two presti-
gious national awards — the Ameri-
can Chamber of Commerce in New
Zealand Export Award for sales to the
U.S., and the New Zealand Interna-
tional Business Award for Research
and Development.

Because of its focus on R&D and a
mission to create products that make
the work of dental professionals easi-
er, with better results, Triodent leads
the way in every area in which it is
represented.

Its primary products include the V3
Sectional Matrix System, the Triotray
dual-arch impression tray and the new
indirect restoration placement aid, the
Griptab. All have one thing in com-
on: they are advances in design and
function.

McDonald’s big breakthrough was
the V-Ring Sectional Matrix System.
The Triodent system, now in its V3 ver-
sion, regularly wins industry awards
and is currently the matrix system
preferred by REALITY and The Dental
Advisor. More importantly it is the pre-
ferred — in fact, raved about — system
used by thousands of real dentists.

Increasing numbers of dentists are
also seeing Triotray and Griptab as
essential for their operatory drawer,
and McDonald is hopeful that these
new products will soon earn the same
industry accolades as the V3.
