Orascoptic launches lightweight, high-def 2.5x loupe

Orascoptic, a leader in vision solutions for dental and medical professionals, recently released its HDL 2.5x — a loupe with micro-sized optics that delivers lightweight comfort and the visual clarity Orascoptic is known for. According to the company, unlike other small telescopes, the HDL does not compromise on field size. The field depth of the HDL rivals that of the Orascoptic award-winning HiRes™ 2.5x, yet the innovative optical design is 25 percent smaller than its predecessor. The HDL design uses an elongated bezel to deliver steep declination angles for improved ergonomics. Each loupe also offers high-definition resolution, creating an enhanced visual acuity for the clinician and better procedural outcomes for the patient, according to the company.

Because the loupe was developed to provide a generous field of view, clinicians are able to easily transition instruments into the viewing field, which may help to reduce examination and procedural times, the company reports. The compact size of the HDL 2.5x also provides significant viewing space above the telescope, making it easier to read charts and consult with patients without having to remove the loupe. While designed for performance, the loupe’s brushed metallic finish and small profile also provide an aesthetic appeal to many users. The loupe is available on all Orascoptic frame models and can be configured as a through-the-lens or a flip-up that employs a new advanced ergonomic hinge.

About the Academy of General Dentistry

The Academy of General Dentistry (AGD) is a professional association of 38,000 general dentists dedicated to providing quality dental care and oral health education to the public. AGD members stay up-to-date in their profession through a commitment to continuing education. Founded in 1952, the AGD is the second largest dental association in the United States, and it is the only association that exclusively serves the needs and represents the interests of general dentists. The academy describes a general dentist as the primary care provider for patients of all ages who is responsible for the diagnosis, treatment, management and overall coordination of services related to patients’ oral health needs.

The AGD is a member of the Partnership for Healthy Mouths, Healthy Lives, a first-of-its-kind national dental coalition composed of 37 leading dental health organizations. The campaign is designed to educate parents and caregivers on how to improve their children’s oral health in simple ways. The campaign offers families oral health resources through the website 2min2x.org. For more information about the AGD and the upcoming AGD annual meeting, visit www.agd.org.
